Thanks to all who worked me. See you again next year, Bernard...**F5RD**. The contest was great fun, over 1500 Qs with just my portable equipment. Condx were okay, 15 was great and had a nice 10m opening sunday morning. See you next year!...**FM/DD5ZZ**. Another great contest. Fewer first time operators this time so all went very smoothly most of the time. Some EMC problems which were not expected...**G0BRC**. Nice conditions! Used new Comet multi-band very pleased. Good luck all...**G0CER**. Just dabbling in this one...**G3LDI**. Operated part-time, but entirely S&P. Did not CQ once...**G3TXF**. Correct my call on several QSOs 3 to 6 times but not all OPs took notice...**G8GHD**. The RTTY ringing in my ears hasn't stopped yet! This is the only contest that I do not use the cluster/spots, and it was Hard Work keeping the QSOs coming. FT2000D - backed down to 100w, running cool 80m half-wave inv.V at 16m - and - HF2V with elevated radials N1MM+ and MMTTY...**G8X**. Not a serious effort. I threw up a quarter wave vertical with two elevated radials for 40m and spent 8 hours in the contest mainly after the family had gone to bed. Its been some time since I made a serious contest effort but i did enjoy it...**GM4FDM**. Just a part time effort from me in this one, as I wanted our visitor GUØURR to have some fun. I enjoyed the contest...**JS6SCC**. lousy condx for 20 RTTY QRP from Hawaii...**KH6BE**. We loved operating here from the islands and still find some kind of way to learn something new each time we come down. Thanks to everyone for all of the Qs and Mults.

80M was really bad from the islands. The noise level was high and the static crashes really made it tough to get any runs going. The runs we attempted were bogged down with retries so we just went back to 40 meters. 40M mess, 40 meters was in great shape. The EU runs were massive which brought the rate down however we were able to pick off a VU from India which is a nice from this part of the world. 20M Was the all around work horse of the contest. We did work an VU and a UN as well but was a bit easier than 40 meters. The noise level was a ton lower from here so we really enjoyed the runs to EU and NA. 15M capacity QSO machine. The rates were grat to EU and some NA was to be had as well even though most was EU in the mornings. JA's were spotted but not really heard much here. 10M did not expect much with 10 meters however we did get one opening to EU around 14z on Saturday morning. EU was very strong and easy with lots of stations calling. Beyond this opening there was not much happening here. We had the mult station listening often but that was the only opening to be had from here...**KP2/WE5DX**. I enjoyed the contest. The propagation was unstable...**KU7FM/KH2**. Decided to spend more time in the RTTY version of CQWW - but missed most of the prime time on 15 and 20m due to prior commitments. Look forward to spend more time next year. It was amazing to see 20m and 15m jam packed all the way upto 150. SO also 40m, I saw some signals above 7100. Running AFSK Tx on 2Tone running under N1MM, Gritty 2nd decoder, TS-590SG + AL80B (400 w), 40m 2-el phased verticals, 20m dipole, 15 & 10m fishing pole verticals, all antenna at 60' on a small rooftop. Due to the prime time breaks, decided to turn this into a mult hunting affair. Worked many good mults on 40m including HP3, C37, FM, FG which are pretty tough from out here. 20m and 15m sounded unusually loud but could not spend much time there. Good to hear several VU stations including the RTTY masters VU2NKS and VU2LBW along with a host of new contest regulars like AE, IBI, MUD etc. Odd one which I hope hthe organizers will fix - KP4BD was sending his ITU zone 11 instead of CQ zone 08. I logged as sent by him :) Thanks to all who called in and also decoded my not so great signals. 73 de Prasad...**VU2PTT**. A recreational effort at best. I consider this the first contest of the season. So everybody welcome to contest season! Yea baby, after a long drought DX and contest season has finally arrived! Oh and the band conditions, well they could be worse? but not by much, and we have all seen them a heck of a lot better. For those who know how to wait there were some openings to

Europe. Fifteen meters actually opened up to South America and Asia late in the contest. No equipment failures here which was nice. Strictly QRO here though. With Fall in the air, no need for a heater as the Alpha kept the shack nice and cozy. I did end up with about half the QSOs I was shooting for. And if I hadn't violated the first rule of contesting (Keep your butt in the chair!) I might have done a lot better. I will attribute that to my advancing age which is a wonderful universal excuse! Now if I can get the sound of RTTY out of my head, which will probably take a week, I will feel a lot better and get ready for the next big one; damn how I hate the thought of a phone contest! For me, a couple 807's and and to bed. Hope you did better than me! 73, C-U-in the next one:-)...**WO7V**. This is another WQ6x operation from W7AYT's QTH.
